

Effective Infection and Protection and Control (EIPC) During Coronavirus/COVID Outbreak

At Radnor Park Kindergarten we seek to deliver safe practice by focusing on measures that will be put in place to help limit risk of the virus spreading within the setting

As a Company we have introduced a number of changes to our policies and procedures have been added to introduce new measures to help all our staff, children and families feel supported. The EIPC has been devised alongside risk assessments, which lay out how we will ensure to mitigate and minimise any risks.

Hierarchy of measures

One of the protective measures we can take to reduce transmission is to ensure we minimise mixing groups of both adults and children. We know that, unlike older children and adults, early years children cannot be expected to remain 2m apart from each other and staff. Therefore, the kindergarten will work through the hierarchy of measures set out in the government [guidance](#):

- Avoiding contact with anyone with symptoms
- Minimising contact and mixing
- Frequent hand cleaning and good hygiene practices
- Regular cleaning of the setting including the environment and resources.

Pregnant staff

Pregnant women are in the clinically vulnerable category and are generally advised to follow the above advice, which applies to all staff in early years settings.

For more information, pregnant staff can also read [guidance and advice on coronavirus \(COVID-19\) and pregnancy](#) from the Royal College of Gynaecologists. All pregnant women should take particular care to practise frequent, thorough hand washing, and cleaning of frequently touched areas in their home and/or workspace.

The kindergarten's workplace risk assessment will consider any risks to female employees of childbearing age and, in particular, risks to new and expectant mothers (for example, from working conditions, or the use of physical, chemical or biological agents). Any risks identified will be included and managed as part of the general workplace risk assessment.

If the setting is notified that an employee is pregnant, breastfeeding or has given birth within the last 6 months, we will review and check the workplace risk assessment to see if any new risks have arisen. If risks are identified during the pregnancy, in the first 6 months after birth or while the employee is still

breastfeeding, we will take appropriate, sensible action to reduce, remove or control them.

While it is a legal obligation for the kindergarten to regularly review general workplace risks, there is not necessarily a requirement to conduct a specific, separate risk assessment for new and expectant mothers. However, an assessment may help identify any additional action that needs to be taken to mitigate risks.

Testing for early years staff, children and families.

Coronavirus testing: Everyone in England is eligible for testing if they become ill with coronavirus symptoms. A negative test will enable children to return to their childcare setting and their parents to get back to work, to obtain a test online visit <https://www.gov.uk/get-coronavirus-test>. A positive test will ensure rapid action to protect peers and staff in at the setting and we will work with staff and families, where testing is required, to arrange for this as soon as possible. Our staff members are committed to undertaking an LFD test every day that they are coming into the setting whilst local numbers of infections are above 100 cases per 100,000 people. This will revert to twice weekly testing when the numbers are below 100 per 100,000 people.

Further information can be found at: www.hse.gov.uk/news/coronavirus.htm

Lateral Flow Test (LFD test)

If a staff member, child or parent has a positive result from a lateral flow device (LFD) test they should self-isolate until they undertake a PCR test. They should notify the setting that they will not be attending the setting on the basis of the LFD test result and should order an immediate confirmatory PCR test within two days of the result. If the confirmatory test is taken within two days and the result is negative, they can stop self-isolating, unless they have developed symptoms or been instructed to self-isolate by Test and Trace for other reasons. The staff member or child should inform the setting and can return to work or face to face learning.

If the result is positive, they should inform the setting that they have had a positive PCR test result and will not be attending the setting for the remaining period of their self-isolation.

Changes to contact tracing

Step 4 of the roadmap went ahead on 19 July and one of the key changes that will take place is that education and childcare settings will no longer be asked to conduct routine contact tracing.

As with positive cases in all settings, NHS Test and Trace will work with either the positive case, or in the case of children, the parents, carers or guardian of the positive case to identify close contacts. NHS Test and Trace already manages the contact tracing process for the rest of society, including children who have recorded a positive PCR test, and has expertise in supporting people to identify close contacts.

PCR tests can be booked online through the NHS Test & Trace App or website or by calling 119.

PCR test results will be recorded with NHS Test and Trace automatically, but you should also communicate the result to the nursery so that we can identify any people that may need to self-isolate.

Self-isolation protocols for close contacts and household members:

Members of the household, and close contacts, that are considered fully vaccinated by the NHS, or are under the age of 18 years and 6 months, do not have to follow self-isolation rules but should order a PCR test for clarity.

Members of households, and close contacts, who are over 18 years and 6 months and are not considered fully vaccinated by the NHS, will need to, if there is a positive LFD or PCR test within their household or a close contact:

1. Self-isolate until a negative PCR test is returned for that member of the household / close contacts and have a PCR test on day 2 of that self-isolation period or
2. Self-isolate, for a 10 full days after the display of symptoms or a positive PCR test of that person, whichever is the soonest and should order a PCR test on day 2 and day 8 of any self-isolation period.

Anyone who has a positive LFD test will need to order a PCR test within two days of the test and should self-isolate until the result of the PCR test is known, and if that is positive for a full 10 days.

For more details regarding this please see:

www.gov.uk/government/publications/covid-19-stay-at-home-guidance/stay-at-home-guidance-for-households-with-possible-coronavirus-covid-19-infection

Contact tracing

If your child gets a positive PCR test result, NHS Test and Trace will contact you, using the details you registered when ordering the PCR test. You and/or your child will be asked a series of specific questions designed to identify who your child has been in close contact with. Being in an education or childcare setting with someone who has tested positive for COVID-19 will not necessarily mean a person is identified as a close contact.

You will be asked to provide the contact details, if you know them, of any of the individuals – or their parents or guardians – who have been identified as close contacts. NHS Test and Trace will then get in touch with these close contacts and provide appropriate instructions or advice (see below).

From 16 August, if the close contact is under 18 and 6 months, they will not have to self-isolate, in line with the policy for fully vaccinated adults, but will be asked to take an PCR test immediately, other than for very young children identified as non-

household contact and will not need to self-isolate while awaiting the results of the test. If the PCR test is positive, they will be required to self-isolate for 10 days from the date of the test. NHS Test and Trace will then get in touch to identify close contacts (see points 5 and 6 above).

Engage with the NHS Test and Trace process

The kindergarten will ensure that we understand the NHS Test and Trace process, and ensure that staff members, parents and carers understand that they will need to be ready and willing to:

- [book a test](#) if they are displaying symptoms - the main symptoms are a high temperature, a new continuous cough or a loss or change to your sense of smell or taste.
- staff and children must not come into the setting if they have symptoms and must be sent home to self-isolate if they develop them in the setting.
- All children can be tested if they have symptoms, including children under 5, but children under 11 will need to be helped by their parents or carers if using a home testing kit.
- provide details of anyone they have been in close contact with if they were to test positive for coronavirus (COVID-19) or if asked by NHS Test and Trace.
- [self-isolate](#) if they are not considered to be fully vaccinated by the NHS, unable to medically have the vaccination, are under the age of 18 years and 6 months or are taking part in a vaccine trial, and have been in close contact with someone who tests positive for coronavirus (COVID-19) symptoms.

Anyone who displays symptoms of coronavirus (COVID-19) can and should [get a test](#). Tests can be booked online through the [NHS website](#), or ordered by telephone via NHS 119 for those without access to internet.

Essential workers, which includes anyone involved in education or childcare, have [priority access to testing](#).

NHS COVID-19 app. The [NHS COVID-19 app](#) is a key part of the country's ongoing coronavirus (COVID-19) response, aiming to extend the speed, precision and reach of [NHS Test and Trace](#). The app is available to download for free and is available to anyone aged 16 and over to download if they choose.

If the kindergarten has a positive case, the setting will advise the relevant bodies: DfE help line 0800 046 8687 (DfE will inform the HPT if their input may be required) and advise on the appropriate course of action.

Minimising contact before entering the setting

- We have minimised contact with individuals who are unwell by ensuring that those who have coronavirus symptoms, or who have someone in their household who does, do not attend the kindergarten unless they are exempt from self-isolation.
- A thermal imaging camera has been set up just inside the kindergarten's main entrance. This will detect every adult's temperature; children's temperatures will

be taken manually using a infrared hand-held thermometer. Any child, or parent/carer of a child, displaying a temperature of 37.8C or above will not be accepted to the kindergarten until the end of the self-isolation period of 10 days unless they have a negative Covid test result.

Please note: Whilst teething can cause some known side effects such as flushed cheeks and sore gums, [NHS guidelines](#) state that fever is not a symptom of teething. If a child has a temperature, they will be sent home and be asked to isolate for 10 days or they have a negative Covid test result.

- Parents are asked to support the kindergarten with checking their child's temperature at home before they arrive at nursery, and staff will be monitoring the children's temperatures if the child is displaying symptoms or appears unwell.
- Our expectation is for parents to inform us if medications have been used that may lower the child's temperature and if there are any household members showing symptoms of COVID-19 i.e., a new continuous cough and or a high temperature of 37.8 C or more (in accordance with the setting's Health Screening on Entry Policy March 2020).
- Staff to check their temperature before they leave for work and will be monitored when they enter the setting and regularly throughout the day.
- For parents and staff, to ensure they wear a face mask where they are in close contact with any adults outside of the staff team at the nursery. We understand that wearing a mask is a personal choice, however, as a setting we feel in order to keep yourselves and others safe we would like to continue with this measure.
- Parents are not to enter the building unless it is for prospective parents tours or settling in sessions. Parents will be invited to events in the garden details of which will be circulated at the time.
- Any work that needs to be done by outside agencies will be done during hours of closing where appropriate.
- Visitors, such as outside agencies working with the setting, prospective parents and parents supporting their child to settle in, can enter the building and must follow specific safety measures. The measures are:
 - To wear a mask
 - Maintain a suitable distance,
 - Complete a Lateral flow test (COVID -19 Self-Test – Rapid Antigen test) which can be obtained through the government website <https://www.gov.uk/order-coronavirus-rapid-lateral-flow-tests> or from the kindergarten.
 - Complete a COVID form on arrival.
 - Sanitise hands on arrival.
- Measures will be in place to discourage parents from gathering at the kindergartens entrance during pick up /drop off times by marking out 2- meter guidelines on the pavement and only one parent at a time at the top of the ramp/entrance. Please can parents take into consideration the increased waiting time due to the one in and out system and if needed we may have to consider staggering starting and finishing times to ease any congestions at the front door. If you find that there is a waiting line to come into the kindergarten please consider staying in your car until the queue has reduced.

- When dropping off and picking up their children from the main entrance's parents must sanitise their own hands at drop off and when picking up their child at the end of their session, and sanitise their child's hands at drop off before their child enters the building.
- For children attending more than one early year's setting, or using a childminder, a risk assessment will be carried out to ensure that safe practices are carried out at both settings.
- Staff to remove work wear once they get home and wash accordingly, ensuring they have a cleanly laundered work uniform for the following day. Staff that are using public transport must change out of their uniform at the end of their shift before they leave the setting.
- We will not be able to store any buggies, bikes, tricycles or scooters at the nursery and would ask that they are all left at home.
- We ask families to have one designated adult to carry out the drop off and collection of their child to minimise the number of adults in the setting entrance. We will work with you to ensure your child can be welcomed and settled by a familiar adult.
- Only parents/carers who are symptom free and/or have completed the required isolation periods will be able to drop off or collect their child.

Minimising contact inside the setting

We will also endeavour to:

- Reduce contact between staff and children by ensuring the movement of children and staff is at a minimum in the setting.
- We have introduced three separate entrances for the baby unit and Caterpillar section, The toddler children and Butterfly section will continue use the main entrance.
- We will minimise contact and mixing by ensuring there is plentiful space with tables and activities spread out, utilising the whole section and the space that is available.
- Staff to split the children into age groups to help minimise contact between different activities.
- Ensure the children's sleep beds are 2 meters apart.
- We will be washing or sanitising the staff and children's hands regularly, washing them thoroughly for 20 seconds with running water and soap and drying them thoroughly or using alcohol hand rub or sanitiser ensuring that all parts of the hands are covered.
- Ensuring good respiratory hygiene - promote the 'catch it, bin it, kill it' approach
- Ensuring that toilets do not become crowded by limiting the number of children who use the toilet facilities at one time (one in one out where practical).
- Noting that some children will need additional support to follow these measures (for example, meaningful symbols, and social stories to support them in understanding how to follow rules).

- We will continue to follow our online safety policy.

Use outside space:

- For children with an EHC plan, we will work with the local authority and parents to decide how best to continue supporting these children to stay healthy
- Stagger the use of staff room and offices to limit occupancy.
- Staff will use age and developmentally appropriate ways to encourage children to follow social distancing, hand-washing and other guidance, including through games, songs and stories.
- Parents/carers will be encouraged to reinforce these messages at home, by asking them to remind their children.

Outdoor learning offers a template for socially distancing and we will utilise the space as much as possible, embracing the benefits of learning and playing in the garden

What parents can do:

- Talk to your children about coronavirus (COVID-19), social distancing and handwashing
- Follow [guidance for households with possible coronavirus infection](#)
- Do not gather at entrance, and model social distancing so that children learn good practice.
- Ensure that Baby unit children go to the entrance at the front of the kindergarten and butterflies and bumblebees access the entrance that leads up to the ramp. Caterpillars have their own entrance that leads to the basement.
- Take into consideration waiting time due to the one in and out system at the main entrance. Once at the entrance door it will take time for staff to check parents and children's temperatures and parents to pass over their children's food bags and any important information.
- Provide a packed lunch and/or tea in a sealed plastic food bag clearly labelled with your child's full name.
- Children will have their own bag with 2 changes of clothes, sunhat, nappies, comforter in etc – they will remain at the kindergarten. When children arrive, their coat will be put into their bag. The kindergarten will inform you when these items need topping up.
- Wash children's comforters daily
- Apply sunscreen before your child comes to nursery.
- Provide up to date emergency contacts before the children start back with us.
- Provide up to date medical, allergy and dietary needs of children.
- Provide information on any changes to parental responsibility.

Parents and carers as Partners

Parental contact and contribution are extremely important and will communicate via telephone, email and our online portal (Parent zone) and ask you to do the same to share information about your child. Staff will maintain safe distancing when sharing

information about your child's day. We may contact you via phone or video conferencing to discuss any other matters rather than face-to-face.

We will continue to keep in touch with any families during summer holidays, and keep sending through home learning ideas.

Parent evenings will not take place in the nursery during this time and will take place electronically for example, via video conferencing.

Online safety

We will continue to share information with parents about online safety and direct them to resources recommended by the government such as e-bug available on the kindergarten's website www.radnorparkkindergarten.com .

Quality of provision

The Early Years Foundation Stage (EYFS) sets the standards that schools and childcare settings must meet for the learning, development and care of children from birth to 5 years old.

As part of our quality practice, we will carry out more frequent cleaning of toys and resources. We still want to provide children with a wide range of activities and experiences, however some of these may differ to minimise the spread of germs.

Special Educational Needs and Disabilities (SEND)

Vulnerable children continue to be expected and encouraged to attend educational provision where it is appropriate for them to do so (for children with education health and care (EHC) plans this will be informed by a risk assessment approach.)

Children, young people and staff who have been classed as clinically extremely vulnerable due to pre-existing medical conditions will have appropriate safety measures and risk assessments be put in place. Any children who do not attend the setting for medical reasons will continue to be supported to learn at home, as much as possible.

Strategies and support will be put in place for any children with noticeable gaps in development progress.

Children's developmental assessments will be carried out as usual and parents evenings will be held over zoom to ensure parent partnership is maintained.

Stay in Touch with Parents or Carers whose Child is at Home

For those children isolating we will endeavour to stay in touch with the children and families by email and 'Parent zone' app by providing a 'Learning and activities' programme to:

- continue to support the learning of children who are not in attendance due to coronavirus by providing home learning packs.
- ensure parents and carers can be supported to provide a positive learning environment at home

We will work with the local authorities to monitor the welfare of:

- vulnerable children who are not attending the setting
- other children they might wish to keep in touch with, for safeguarding purposes

Medication and Accident forms

As an early year setting, we have to ensure we implement our policy and procedures for administering medicines and must include systems for obtaining information about a child's needs for medicine and for keeping the information up to date. EYFS 2017(3.44).

Medicine -Online Permission

- We will send out to all parents a 'Medication Form' via email or by post if some parents don't have access to email.
- These forms are for parents to complete in the event a child needing medication to be administered while at the setting.
- Parents will be asked to fill in all the details on the form, then email the completed form back, or post it, to the kindergarten before the child arrives for nursery. If that is not possible, please bring the completed form with you when you come in. This enables the kindergarten to have an accurate written record.
- Staff will then record on the same document the time and dosage of medicine administered to a child and by whom.
- Staff will use the IConnect / Parent zone system to upload a photo of the fully completed form and any additional information at the end of a child's session.
- This will give parents confirmation of when, and by whom, the medicine has been administered.
- Parents will be asked to type a comment on the uploaded post, this will act as a verification they have read the form as we are not able to currently obtain a parental signature.

If anyone becomes unwell whilst at nursery, we will contact their parent/carer immediately and they will be sent home. Due to the nature of Covid-19, a key symptom of which is a high temperature, non-prescribed medication will not be administered unless in emergency situation (with prior permission).

Accidents

In the event a child has an accident at the setting, we will:

- Record any accident on the appropriate forms.

- Take a picture of the completed form and upload to the iConnect / Parentzone system
- Only contact the parent/carer by phone if it is an injury to the head or an accident which is deemed major i.e., swelling, cut, blood loss. This will give parents a clear picture of what happened and appropriate action taken.
- On collection parents will be asked to read the accident form and sign

Safeguarding Children

We will continue to follow our comprehensive safeguarding policy and procedures.

In addition, we will follow the specific government Covid-19 safeguarding in school's document: www.gov.uk/government/publications/covid-19-safeguarding-in-schools-colleges-and-other-providers

During the current pandemic we will endeavour to continue to have a practitioner designated to take lead responsibility for safeguarding. When this is not practical to have a safeguarding lead based on-site, for example, the unavailability of courses to complete a safeguarding lead, the safeguarding lead will still be available to provide support, advice and guidance for staff.

All kindergarten staff and volunteers have access to a designated lead practitioner and know on any given day who that person is and how to speak to them.

Visitors to the setting

At present we allow prospective parents to view the setting and parents to support their child in the settling in process. In certain circumstances outside agencies whom are working closely with the kindergarten will be able to enter the setting.

A record is kept of all visitors which follows the guidance on [maintaining records of staff, customers and visitors](#) to support NHS Test and Trace. The systems of control we currently have in place and expect all visitors to follow are:

- To wear a mask
- Maintain a suitable distance,
- Complete a Lateral flow test (COVID -19 Self-Test – Rapid Antigen test) which can be obtained through the government website <https://www.gov.uk/order-coronavirus-rapid-lateral-flow-tests> or from the kindergarten.
- Complete a COVID form on arrival.
- Sanitise hands on arrival.

Managing prospective parents and new intakes of children:

Starting nursery can be a difficult time not only for children but for parents and to ease that process we are allowing parents to enter the building for viewings and settling in sessions. We have adapted the settling in process etc to ensure we are following correct protocol and social distancing measures and put in place

simple steps to aid the transition process (see updated settling in policy amendments).

- Prospective parents will be asked to follow the systems of control we currently have in place. Please refer to the section above (Visitors to the setting).
- Children will have their settling in sessions in their new environments and parents can monitor their transition during this process in the section.
- When a settling in session is taking place we ask that only one parent attends with their child and the session lasts no longer than an hour and that the parent maintains a distance from the staff and other children where practical.
- Virtual/telephone pre-start meetings will be held with parents of new starters and key person to discuss child's needs, interests and routines.
- Information about safety arrangements, settling in documents, contracts and admission form will be sent online or by post.

Note: Any new families will be asked to sign a health declaration form to confirm the child or no one in the family has any symptoms of coronavirus.

Transitions

Taking into account the Transition Matters Framework 2016 we will support children and their families to ensure a smooth transition back to the setting and for new children starting with us.

- Assign each child a key person and buddy.
- Provide a photograph of the key person and buddy.
- Share information between original key person and new key person where appropriate.
- Utilise the iConnect / Parentzone system as an alternative method of communication between parents/carers.
- We will ask parents to post on the iConnect, or by email, updated information about the children's interests, routines, favourite songs, games and activities.
- Ask parents to send by email photos of the children's family, which we can display in the child's environment.
- Parents can view their child's section and meet their new key person at pre-arranged times.

Adult use of face coverings

In early years settings, the guidance for face coverings no longer applies for children or adults but as a nursery we would appreciate your continued support in wearing a face covering in order to protect the kindergarten community. Staff will continue to wear face masks at the front doors where they are in close proximity to the parents and around communal areas. Face coverings will not be worn in the sections where the children are attending.

Face masks may need to be mandatory if there are a significant number of cases at the setting.

By face masks we do not mean the wearing of a surgical or other medical grade mask but a facial covering of the mouth and nose that is made of cloth or other textiles and through which we can breathe. Face masks must cover both mouth and nose and not be allowed to dangle around the neck. They also need to be changed when they become moist or damaged. (follow guidance on [how to put PPE on and take it off safely](#) in order to reduce self-contamination).

When applying or removing the covering, it is important that staff wash their hands first and avoid touching their face. After each use, they must wash the face covering at 60 degrees centigrade or dispose of safely.

Personal protective equipment (PPE)

We will ensure we have access to plenty of supplies of gloves, aprons and appropriate PPE.

- If a child becomes unwell with symptoms of coronavirus while at the setting, they will need direct personal care until they can return home. A face mask will be worn by the member of staff, as well as gloves, an apron along with eye protection in case there is a risk of splashing to the eyes, for example from coughing, spitting, or vomiting.
- Staff to wear PPE (gloves and aprons) during routine intimate care needs. Staff should pay particular attention to handwashing before and after supporting children with nappy changing or when helping with toileting or eating, as well as avoiding touching their own face whilst at work
- Staffs' hair will be tied back, they will wear no jewellery or watches only wedding and engagement ring. Nails may have neutral coloured varnish and will be cut down as short as possible in line with our current staff code of conduct.

Handwashing

Regular handwashing with soap and water, and for at least 20 seconds, is the best way of staying safe. Handwashing with soap employs mechanical action that loosens bacteria and viruses from the skin, rinsing them into the drain. Drying hands afterwards makes the skin less hospitable to the virus. Hand sanitiser can be effective if soap is not available, or the situation makes using soap less feasible (for example, when outside), but using hand sanitiser provides none of the virus-destroying friction that rubbing your hands together and rinsing with water provides.

- Always carry tissues with you and use them to catch your cough or sneeze, then bin the tissue in the dedicated tissue bin, and wash your hands, or use a sanitiser gel.
- Wash your hands often with soap and water, especially after using public transport. Use a sanitiser gel if soap and water are not available.
- Wash hands before and after eating, after sneezing or coughing.

- Staff to increase the frequency of handwashing and use of a nailbrush (and always doing so before and after, for example, feeding children or changing nappies) and cleaning of surfaces and toys
- Avoid touching your mouth, eyes and nose
- Staff to supervise young children to ensure they wash their hands for 20 seconds with soap and water (or hand sanitiser if soap is not available or feasible in the particular situation) and catch coughs and sneezes in tissues.
- Staff will use puppets or dolls with the children to demonstrate symptoms (sneezing, coughing, fever) and what to do if they feel sick (i.e., their head hurts, their stomach hurts, they feel hot or extra tired) and how to comfort someone who is sick (cultivating empathy and safe caring behaviours)
- We will ensure that bins for tissues are emptied throughout the day and use gloves to dispose of the items appropriately.

Environment

- All of the nursery environment will be risk assessed.
- Where possible, all spaces will be well ventilated using natural ventilation (opening windows)
- We will prop doors open, where safe to do so, bearing in mind fire safety and safeguarding, to limit use of door handles and aid ventilation
- We will regularly clean frequently touched surfaces such as door handles, handrails, table tops, play equipment, toys and electronic devices using Newline multi surface cleaner.
- At the end of the day and close of business all kindergarten rooms will be de-fogged with a sterile solution
- The soft play area and the ball pool will only be used by the caterpillar section and de-fogged at the end of the day.
- We will seek to prevent the sharing of food, drink, utensils, equipment and toys. Equipment, toys and surfaces should be cleaned and disinfected more frequently.
- If a member of staff or child becomes unwell with a new, continuous cough, or a high temperature, at the kindergarten, they will be sent home and advised to follow the [staying at home guidance](#) .
- Signs and posters will be displayed in the relevant areas reminding staff, children and parents on reducing the risk of infection.

Meals

We will continue to monitor and implement official guidelines from Public Health England with regard to COVID -19 so that we can continue to cater safely during coronavirus.

- During meal times children will be supervised at all times when eating and drinking, to ensure that they do not share cup/utensils or food.
- Fresh drinking water is always available.

- We ask that packed lunch items in a sealed plastic food bag with the child's full name clearly labelled on the bag.
- hygiene and cleaning procedures we have developed have been based on public health guidance on coronavirus.

Daily cleaning regime

It is recommended that all educational settings follow the Public Health England (PHE) guidance on [cleaning for non-healthcare settings](#).

- We will increase in cleaning of surfaces in the kindergarten and toys and resources, this includes, but is not limited to, keyboards, iPad, tables, chairs, door handles, light switched and bannisters, using our standard cleaning products.
- All rooms will be cleaned thoroughly at the end of each day by the setting cleaner
- Toilets will be sprayed and cleaned after each use.

Deep Clean

The nursery will be sanitised once a day at end of closing using a defogger.

What happens if someone becomes unwell at the setting?

If anyone becomes unwell with a new, continuous cough or a high temperature at the setting, they must be sent home and advised to follow the [COVID-19: guidance for households with possible coronavirus infection guidance](#).

- If a child is awaiting collection, they will be moved, if possible, to an isolation area where they can be isolated behind a closed door or in the outside garden. If inside, ideally, a window should be opened for ventilation.
- If they need to go to the bathroom while waiting to be collected, they should use a separate bathroom if possible. The bathroom should be cleaned and disinfected using standard cleaning products before being used by anyone else.
- PPE should be worn by staff caring for the child while they await collection
- In an emergency, call 999 if they are seriously ill or injured or their life is at risk. Do not visit the GP, pharmacy, urgent care centre or a hospital.
- If a member of staff has helped someone who was unwell with a new, continuous cough or a high temperature, they do not need to go home unless they develop symptoms themselves (and in which case, a test is available) or the child subsequently tests positive (see 'What happens if there is a confirmed case of coronavirus in a setting?' below). They should wash their hands thoroughly for 20 seconds after any contact with someone who is unwell. Cleaning the affected area with normal Newline disinfectant after someone with symptoms has left will reduce the risk of passing the infection on to other people. See the [COVID-19: cleaning of non-healthcare settings guidance](#).
- When a child, young person or staff member develops symptoms compatible with coronavirus, they will be sent home and advised to take a test. All staff

and students who are attending an education or childcare setting will have access to a test if they display symptoms of coronavirus, and are encouraged to get tested in this scenario. If the test is positive, they will have to self-isolate for 10 days. Their fellow household members should self-isolate for 10 days if they are not considered to be exempt.

- Where the child or staff member tests negative, they can return to their setting and the fellow household members can end their self-isolation.

What happens if there is a confirmed case of coronavirus in a setting?

Where the child or staff member tests positive, they will be advised to self-isolate for 10 days, along with the other members in their household, if not exempt from self-isolation. Members of that wider group do not need to self-isolate unless the child or staff member subsequently develops symptoms. In these cases, all information will be recorded on an incident form.

The setting will inform the relevant bodies of a positive case:

- The kindergarten will report all COVID -19 cases and situations to our: **Local Authority (Steph Harvey – Childcare Sufficiency Officer: Office: 03000 415038 | Mob: 07917 639077)**

The kindergarten will also inform **Ofsted** by:

- Access the Ofsted website and [Report a serious childcare incident service](#), and follow the steps below:
 1. Complete the form by selecting “What type of incident do you want to report?”.
 2. Select the option “Child or member of staff testing positive for COVID-19, or closure due to COVID-19” as the type of incident you want to report.
 3. On the “Details of incident” page, provide the information below.

Information to include: If reporting a positive COVID-19 test by a member of staff or a child, or a closure of your setting due to COVID-19, the kindergarten must tell Ofsted about important dates and who was present.

Where there is a positive test, you must tell Ofsted whether it was by a member of staff or a child. However, you do not need to give us their personal details.

Dates: You need to tell us the following dates:

- when COVID-19 cases were first suspected
- when COVID-19 cases were confirmed as positive
- when the setting is closing from, and when you intend to re-open if applicable

Who was there:

OFSTED will need to know the total number of children attending the setting and staff working at the time of the suspected case

Other information you should include: OFSTED will also need to know if:

- notified the case to Public Health England via the [Department for Education helpline](#) and any advice they gave you
- advised the local authority
- taken any other action

Staff and children in contact with anyone who has tested positive **will be notified by Test and Trace if they need to have 10-day isolation period** even if they take a test and receive a negative result.

Staff and children who are isolating after being contacted, can return to nursery after self-isolating for 10 days as long as they feel well and have no remaining symptoms.

The kindergarten can ask for verbal /written confirmation of a negative test, but parents are not required by law to provide the full test result.

Note: When an individual has had close contact with someone with coronavirus (COVID-19) symptoms

Any members of staff who have provided close contact care to someone with symptoms while wearing PPE, and any other members of staff or children who have been in close contact with the person with symptoms (even if wearing a face covering), do not need to go home to self-isolate. They must, however, self-isolate and [arrange for a test](#) if:

- the symptomatic person subsequently tests positive
- they develop symptoms themselves
- they are requested to do so by NHS Test and Trace or the PHE advice service (or PHE local health protection team if escalated)

Those considered fully vaccinated do not need to self-isolate if the person they are in close contact with tests positive but will need to follow the protocol if they develop symptoms or are asked to self isolate by Test and Trace.

The most important symptoms of coronavirus (COVID-19) are recent onset of any of the following:

- a new continuous cough
- a high temperature
- a loss of, or change in, your normal sense of taste or smell

For most people, coronavirus (COVID-19) will be a mild illness. However, if you have any of the symptoms above you must stay at home and arrange to have a test to see if you have COVID-19 www.nhs.uk/conditions/coronavirus-covid19/testing-and-tracing

A person with coronavirus (COVID-19) is thought to be infectious 2 days before symptoms appear, and up to 10 days after they start displaying symptoms. If someone without symptoms tests positive then we estimate their period of infectiousness from 2 days before the positive test till 10 days after the test result.

If that person has not developed new symptoms of COVID-19 and has tested positive within 90 days of a previous positive test, they do not need to self-isolate again. Current advice is people only remain infectious for a period of 10 days from

symptom onset, the test can pick up fragments of DNA for many weeks after this. However, if the person previously recovered, then develops new symptoms and tested positive, this will be treated as a new infection. This is because lack of evidence that previous infection offers any long-term immunity to coronavirus.

Cleaning after someone has become ill with suspected coronavirus

- Areas where a symptomatic individual has passed through and spent minimal time, such as corridors, but which are not visibly contaminated with body fluids can be cleaned as normal with Newline multi surface spray, which will reduce the risk of passing the infection on to other people.
- All objects which are visibly contaminated with body fluids and all potentially contaminated high-contact areas such as bathrooms, door handles, telephones, grab-rails in corridors and stairwells will need to be cleaned appropriately.
 - Wear disposable or washing-up gloves and aprons for cleaning. These should be double-bagged, then stored securely for 72 hours then thrown away in the regular rubbish after cleaning is finished
 - Use disposable cloths or paper roll and disposable mop heads, to clean all hard surfaces, floors, chairs, door handles and sanitary fittings with warm soapy water. Then disinfect these surfaces with cleaning products
 - Multi surface cleaner which is effective against enveloped viruses should be used.
 - Avoid creating splashes and spray when cleaning.
 - If an area has been heavily contaminated, such as with visible bodily fluids, from a person with coronavirus (COVID-19), use protection for the eyes, mouth and nose, as well as wearing gloves and an apron
 - Wash hands regularly with soap and water for 20 seconds, and after removing gloves, aprons and other protection used while cleaning
 - Any cloths and mop heads used must be disposed of and should be put into waste bags as outlined below.
 - When items cannot be cleaned using detergents or laundered, for example, upholstered furniture and mattresses, steam cleaning should be used.
 - Any items that are heavily contaminated with body fluids and cannot be cleaned by washing should be disposed of.

Waste

Waste from possible cases and cleaning of areas where possible cases have been (including disposable cloths and tissues):

1. Will be put in a plastic rubbish bag and tied when full.
2. The plastic bag will then be placed in a second bin bag and tied.
3. It will be put in a suitable and secure place and marked for storage until the individual's test results are known.

4. Waste will be stored safely and kept away from children. The waste will not be put in communal waste areas until negative test results are known or the waste has been stored for at least 72 hours.
 - If the individual tests negative, this can be put in with the normal waste
 - If the individual tests positive, then it will be stored for at least 72 hours and put in with the normal waste
 - If unable to store for at least 72 hours, we will arrange for collection as a Category B infectious waste by our local waste collection authority.

Laundry

We will wash items in accordance with the manufacturer's instructions, use the warmest water setting and dry items completely. Dirty laundry that has been in contact with an unwell person can be washed with other people's items. Use laundry sanitising solution at every wash.

Do not shake dirty laundry, this minimises the possibility of dispersing virus through the air.

Clean and disinfect anything used for transporting laundry with our usual products, in line with the cleaning guidance above.

The kindergartens policy and procedure Pack - COVID-19 Addendum

The kindergarten has a comprehensive range of policies and procedures to ensure high quality care and learning, compliance with EYFS (2017) and all relevant legal requirements. These are sent out to all new starters and are also available on the kindergarten's website www.radnorparkkindergarten.com

A Coronavirus COVID -19 addendum has been attached to ensure all changes between September 2020 addendum and this January 2021, have been implemented into the settings policies and procedures.

The following information has been gathered from the latest Government documents:

Duty Manager Daily Effective Infection and Protection Checklist

1. Promote and demonstrate regular hand washing and positive hygiene behaviours and monitor their uptake.

Ensure adequate, clean toilets for children and staff

- Ensure soap and safe water is available at age-appropriate hand washing stations
- Ensure all children and staff are washing their hands every 20 minutes and thorough washing (at least 20 seconds) is adhered to. If not possible then hand sanitisers can be used.
- Place hand sanitisers in toilets, rooms, halls, and near exits where possible
- Ensure toilets are cleaned twice daily.
- Ensure all tissue bins are regularly emptied.

2. Clean and disinfect setting and sections, especially water and sanitation facilities at least once a day, and in particular surfaces that are frequently in contact with people, e.g., railings, tables, bannisters, door and window handles, toys, teaching and learning aids etc.)

- Ensure appropriate equipment for cleaning
- Ensure well stocked cleaning equipment and PPE (liquid soap, hand sanitiser, gloves, plastic aprons).
- Ensure toys are disinfected daily
- Check sections cleaning rota

3. Increase air flow and ventilation where climate allows (open windows, use air conditioning where available, etc.)

4. Post signs encouraging good hand and respiratory hygiene practices

5. Ensure bins are not over full and cleaned and removed daily and disposed of safely
